# Disney Plus Parental Controls Guide
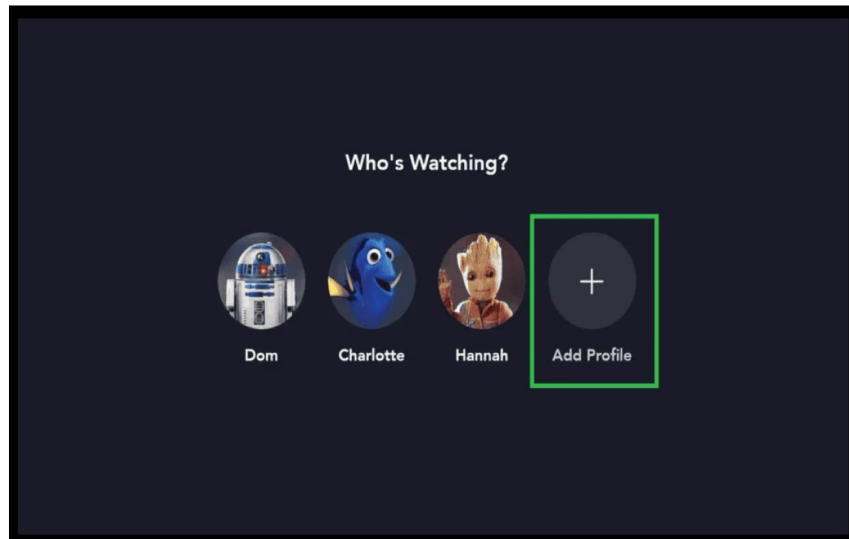

Controls & settings guide

Disney+ parental controls help you keep your family watching content appropriate for them. Every family can customise the parental control tools to meet their needs.
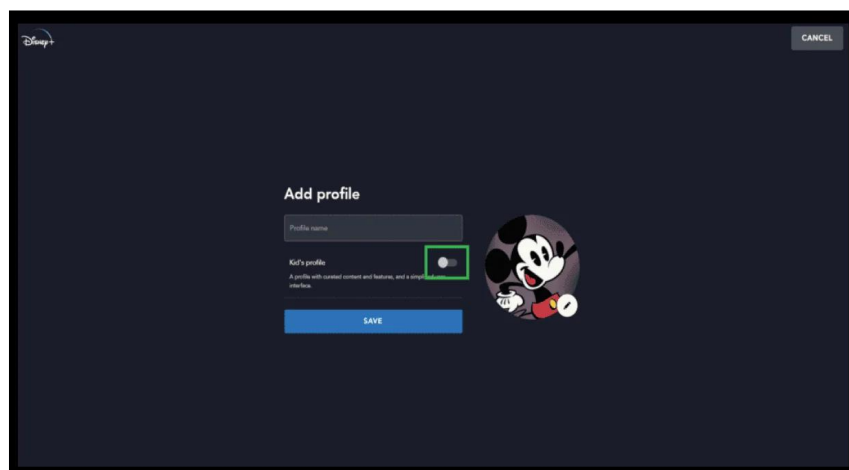

1 How to create a kid's profile

Step 1 – Tap "**Log in**" in the top-right hand corner and enter your login details.

**Step 2** – On the profile selection screen, choose "**Add Profile**".

When creating the profile, toggle the "Kid's profile" option on. This will make the platform easier to explore and use, and it will only show content that is suitable for all ages.
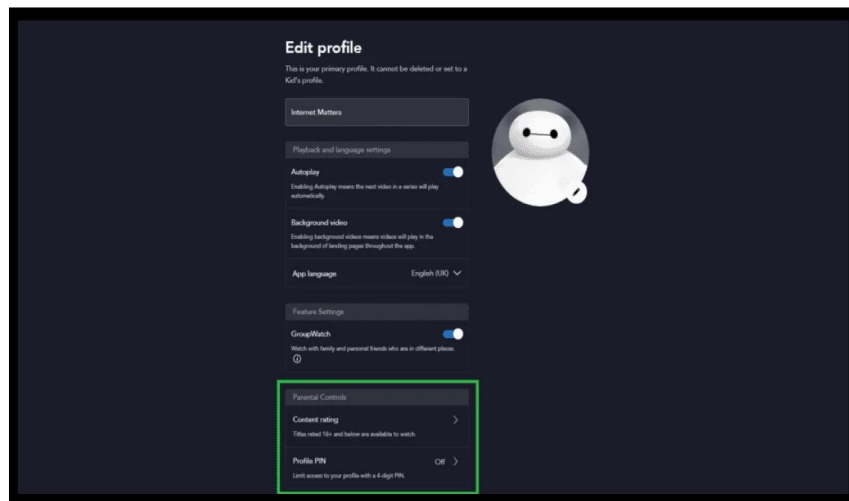

2 How to set a pin

Step 1 – On the profile selection page, select "**Edit Profiles**" and choose which profile you'd like to set a pin for.

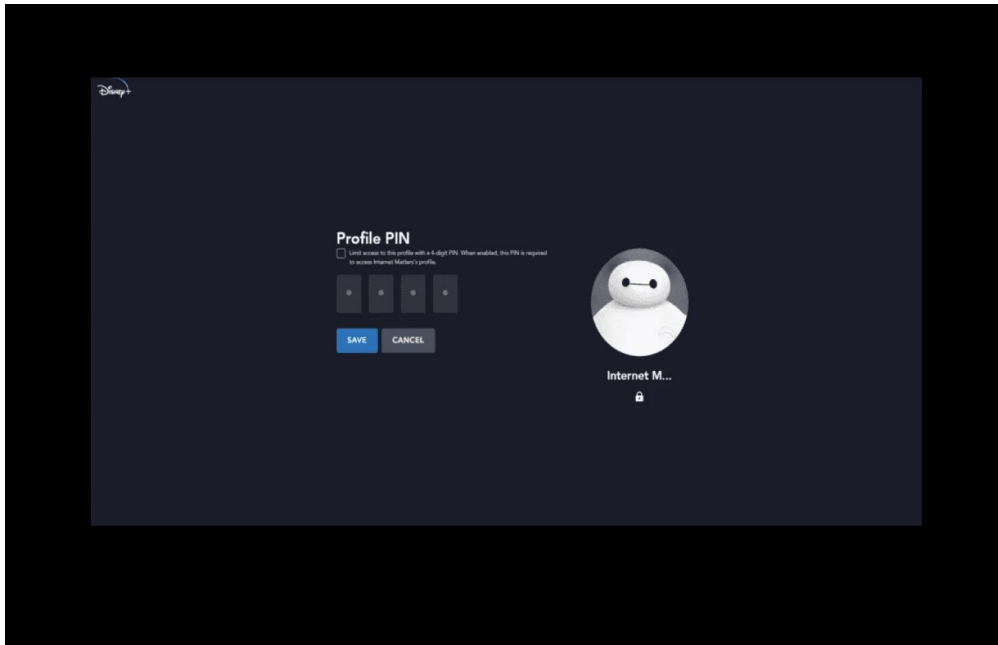

Step 2 – At the bottom of the profile page, find "**Profile PIN**" under "**Parental Controls**".

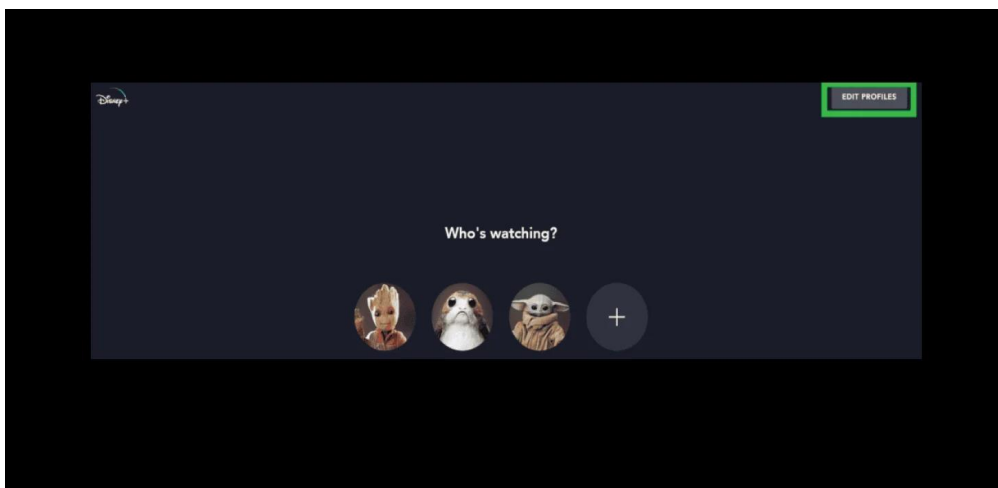

Step 3 – Set a **4-digit PIN**. If you want to limit who can use this profile, toggle the option on. This will mean that kids cannot use this profile to access inappropriate
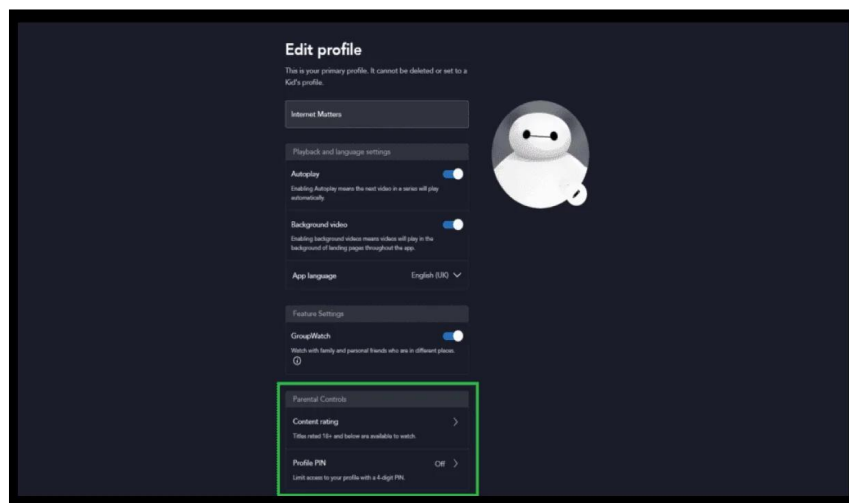

content.

**3** **How to set a maturity level on profiles**

Step 1 – On the profile selection page, select "**Edit Profiles**" and choose which profile you'd like to set a maturity level on.

Step 2 – At the bottom of the profile page, find "**Content rating**" under "**Parental Controls**".

Step 3 – Choose which maturity level you would like for the profile

 Other profile features

Beyond parental controls, Disney+ profiles also have other features you can set for your child.

Playback and language settings

Autoplay limits how much time your child spends watching Disney+. Turn it off to help them step away once one thing finishes.
Background videos can be turned off here if your child's device slows down with additional videos in the background.
App language lets you change the app language from English (UK) to a number of other available languages.

Feature Settings

GroupWatch allows users to watch the same content at the same time even if they are not at home together. All users must have a Disney+ subscription to use this. Turn this off if you need to keep your child from misusing it.
