

Os X Mavericks Safety Controls & settings guide

Mavericks Parental control allows your kids to have a safe and happy experience on the Mac. Using Parental Controls preferences, you can manage, monitor, and control the time your kids spend on the Mac, the websites they visit, and the people they chat with.

How to set parental controls on OS X Mavericks

To set parental controls on OS X Mavericks:

Step 1 – On your mac desktop, choose Apple menu in top corner and system preferences.

About This Mac			
System Preferences			
App Store	T update		
Recent Items	•		
Force Quit Finder	CROJ		
Sleep Restart Shut Down			
Log Out thomas goddard	1 OXQ		
	States & Contraction		

Step 2 - Then click 'Parental Controls'.

Step 3 – When you open Parental Controls preferences.

If you see the message "**There are no user accounts to manage**," you'll need to create another profile which you can manage.

Step 4 – Select the user, then click 'Enable Parental Controls'.

Step 5 – Click one of the tabs along the top to start restricting things.

First on the list is Apps. Specify which apps the child can access.

Step 6 - Select web to specify which websites the child can access.

Step 7 - Select stores to specify which online entertainment sites the child can access.

Step 8 - Select time to specify what time periods the child can access the mac.

Step 9 - Select privacy to specify which apps can access the child's data.

Step 10 - Select other.

This will allow you to specify the last remaining software you may want the child to have restricted access too.
