Pokemon Go Safety Controls & settings guide

Pokemon GO safety features on the app include pop up warnings to users to encourage safe play and a reporting tool to report any issues with the game or inappropriate gameplay.

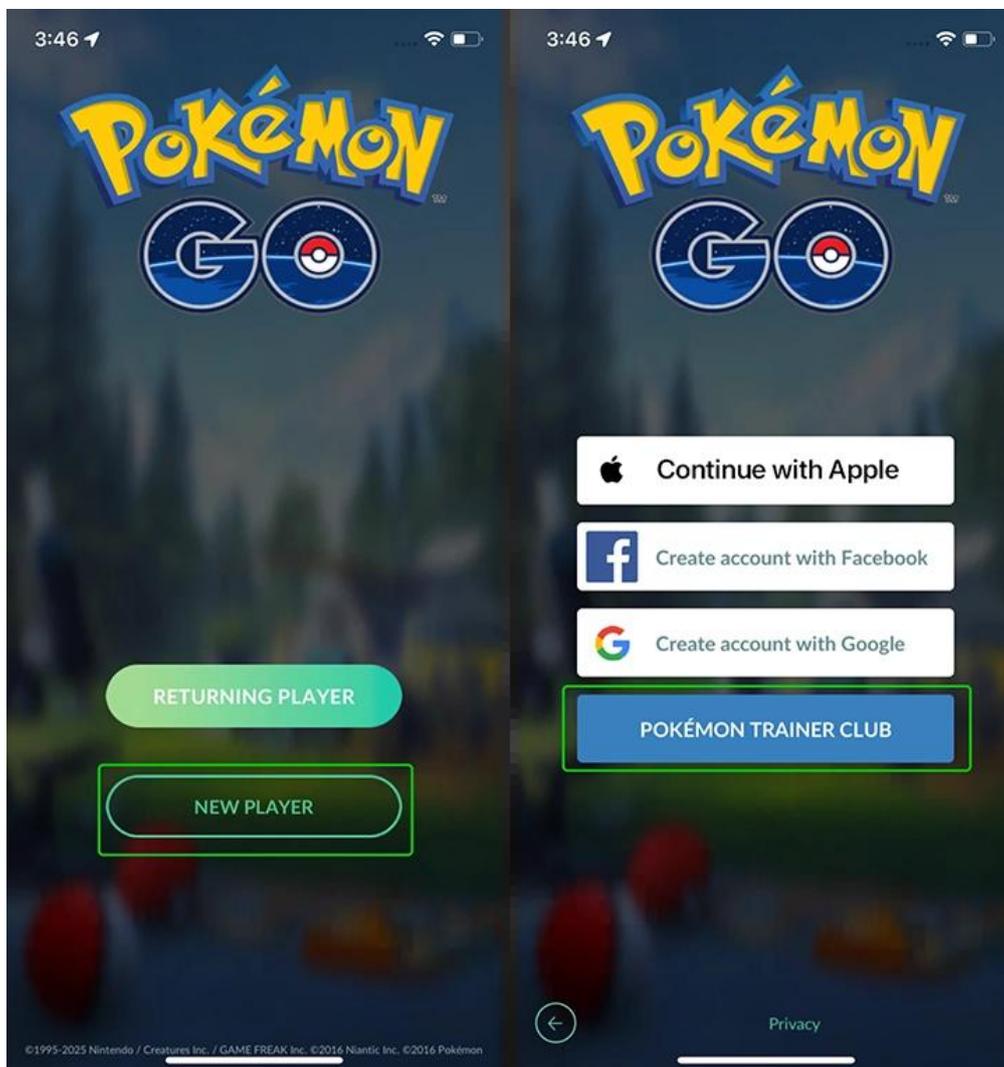

1 Creating a parental account

Pokémon Go lets parents add children to their Pokémon Trainer Club account, allowing them to edit their child's experience on the app to keep them safe.

To set up a Pokémon Trainer Club account:

Step 1 – Open the Pokémon Go app and select **New Player**.

Step 2 – Click on **Pokémon Trainer Club**.

Step 3 – On the Pokémon Trainer Club login page, click **Create an Account**.

< > ↗

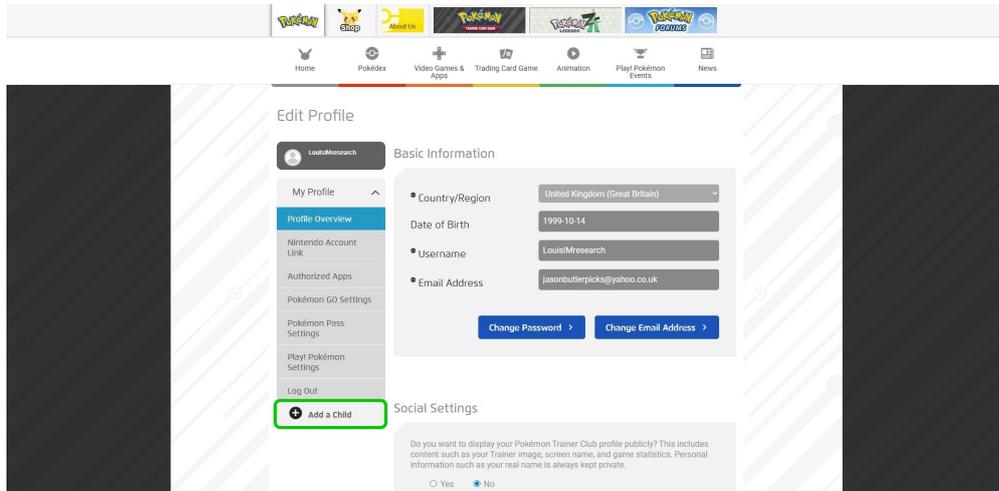

You will be taken through a standard account setup process, inputting an email address and choosing a username and password. Once this is complete, your Pokémon Trainer Club account will be created.

2 Adding a child to your account

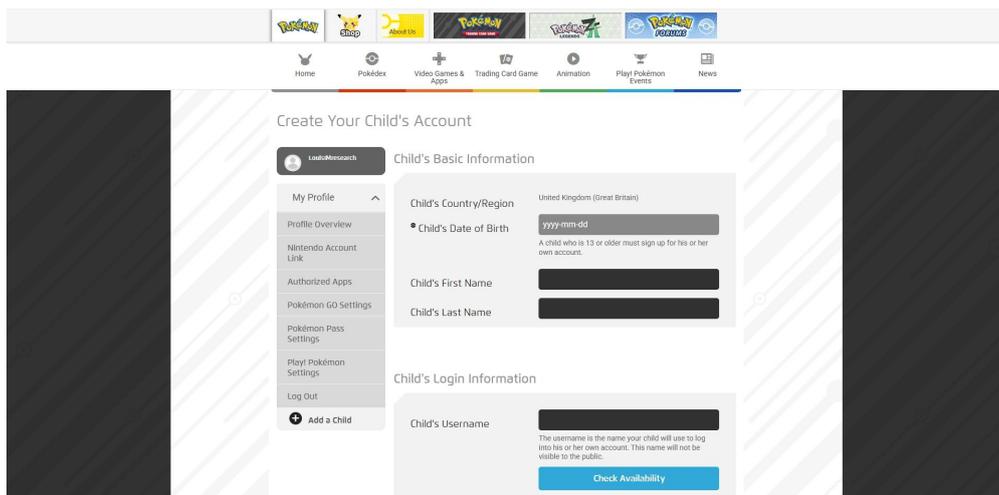

Once you have created a Pokémon Trainer Club account, you can add your child's profile to it and manage it from your Pokémon Trainer Club account settings.

To add a child to your Pokémon Trainer Club account:

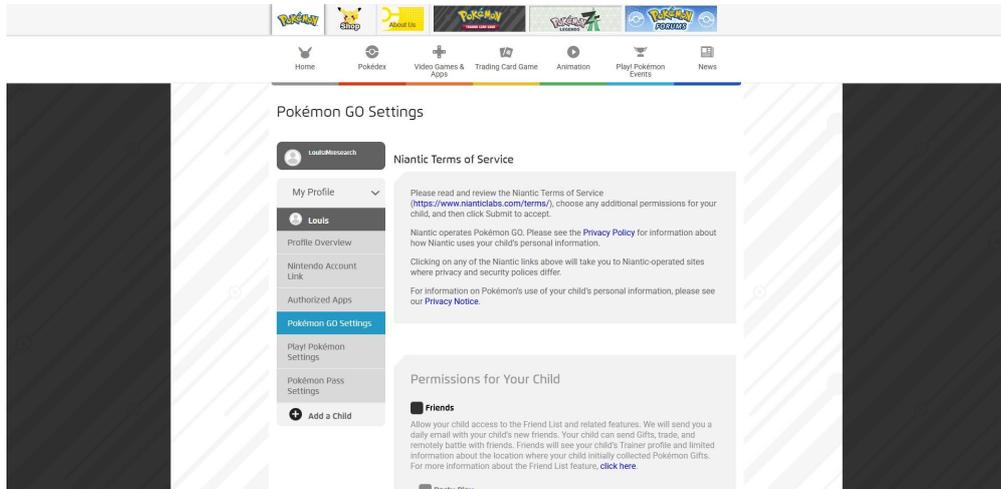

Step 1 – In the **Pokémon Trainer Club settings** select **Add a Child**.

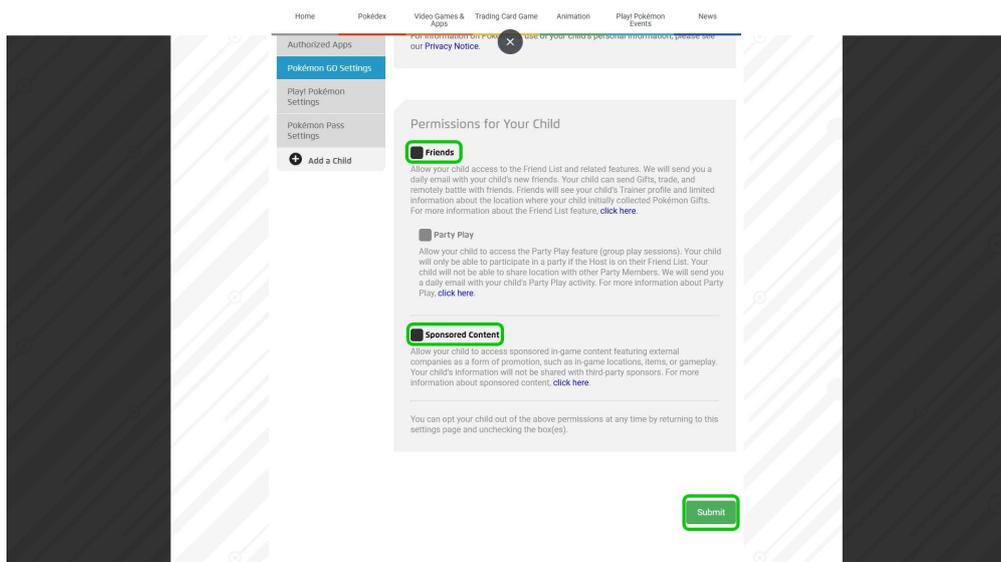

Step 2 – On the **Create Your Child's Account** page, fill in your child's details such as their name, date of birth and login details.

Step 3 – Once your child's profile has been added to your account, you can begin managing their settings. Go to **Pokémon Go Settings** to start editing them.

Step 4 – By default, children will not be able to access friends and social features or access sponsored content. To allow these, click the **toggle boxes** on the settings page.

Once you are done making changes, click **Submit**. These are the only controls that can be set on children's Pokémon Go accounts.

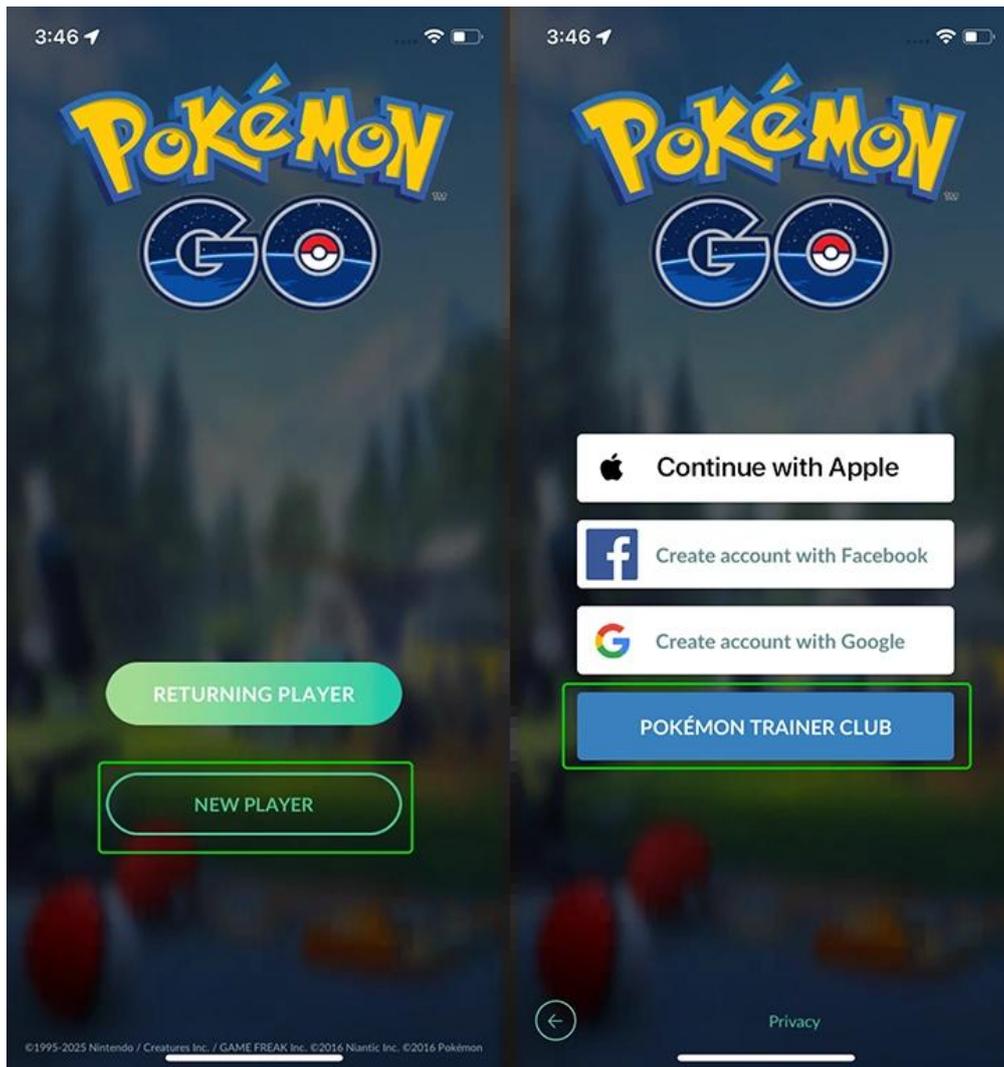

3 Setting up your child's account

If you have added your child's profile to your Pokémon Trainer Club account, you can now set up their profile in Pokémon Go.

To set up your child's Pokémon Go account:

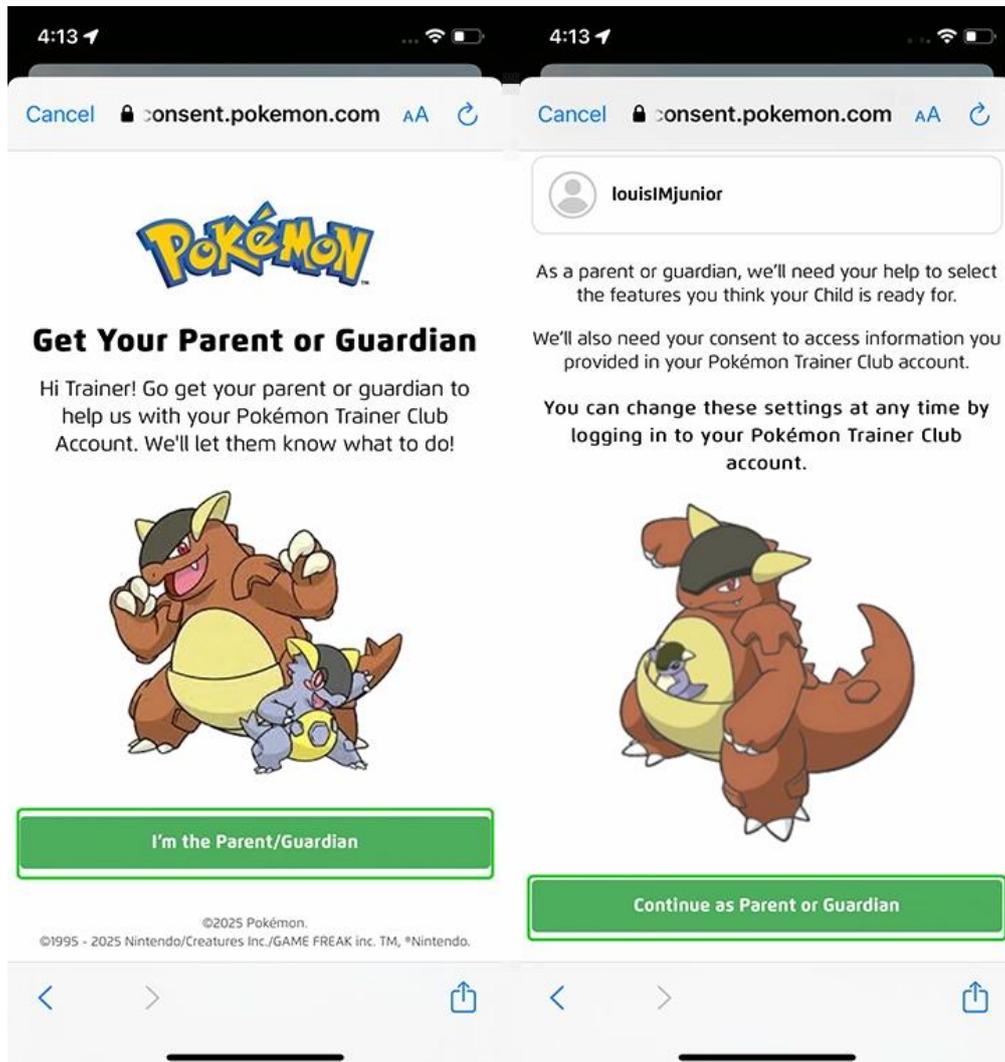

Step 1 – On the **Pokémon Go app** home screen select **New Player**.

Step 2 – Click **Pokémon Trainer Club** and input your child's login details.

Step 3 – You will be taken to a page where you must confirm that you are the Parent or Guardian of the child. Click **I'm the Parent/Guardian**.

Step 4 – On the next page, select **Continue as Parent or Guardian**.

Step 5 – You will be shown your child's parental permissions, and be given a chance to edit them again. Once you are happy with your child's settings, click **Continue**.

Step 6 – Your child is now ready to play Pokémon Go with the security of parental controls. Tap **Back to Pokémon Go** to allow them to start playing.
