## Vodafone Content Control Controls & settings guide

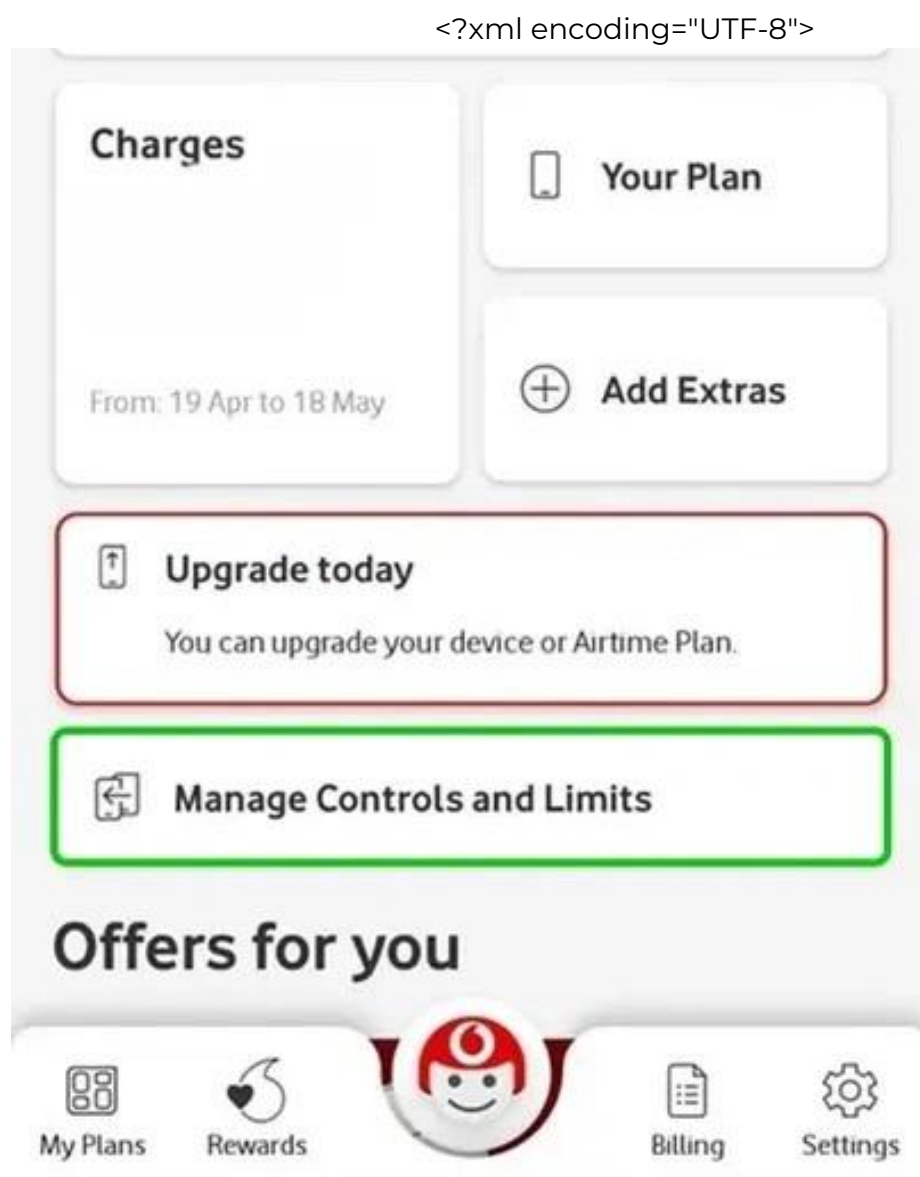

Vodafone Content Control allows you to block age-inappropriate and explicit content when the device is using the mobile network out of the home. In addition they also offer the Vodafone Guardian App for Android devices, allowing you to control the calls and texts to promote online safety.

## 1 Setting up content controls

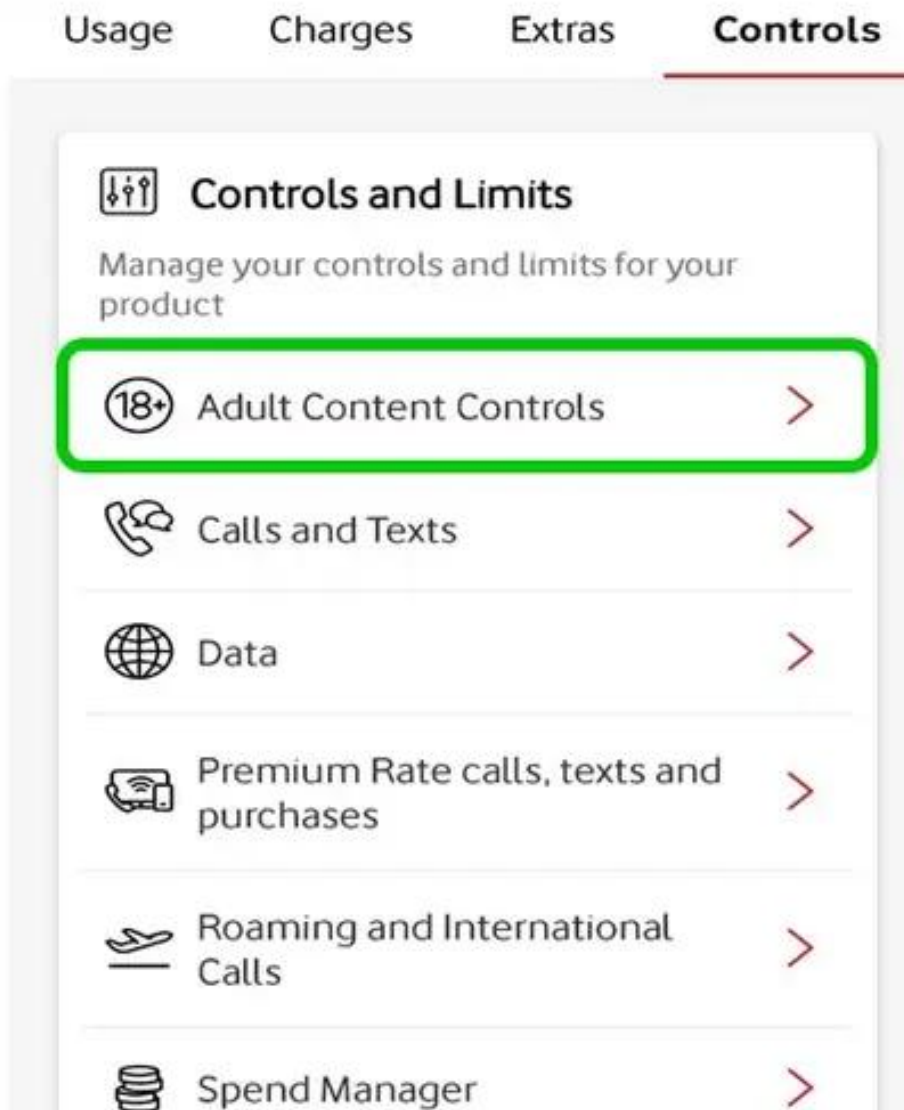

You can begin setting content controls by logging into the My Vodafone app and turning on a content block.

**Step 1** – From the My Vodafone app homepage, select **Manage Controls and Limits**.

**Step 2** – In the **Controls and Limits** menu, click **Adult Content Controls**.

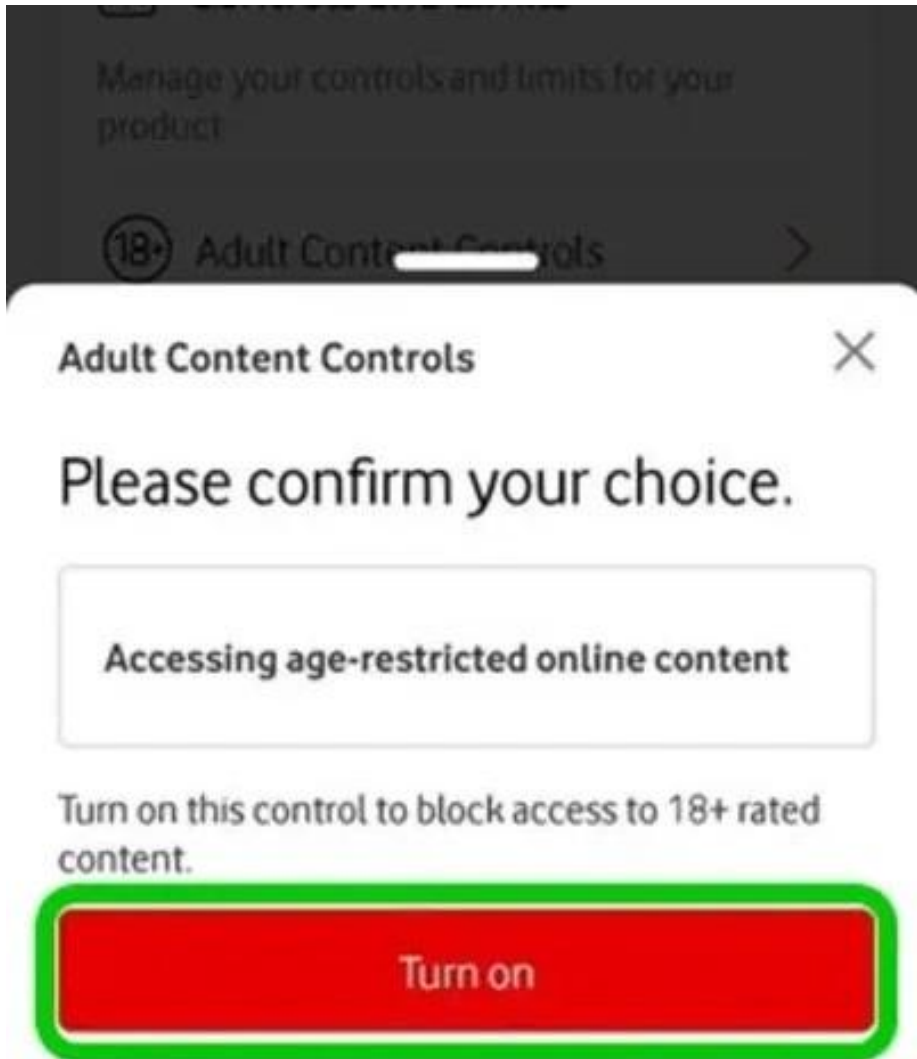

<?xml encoding="UTF-8">

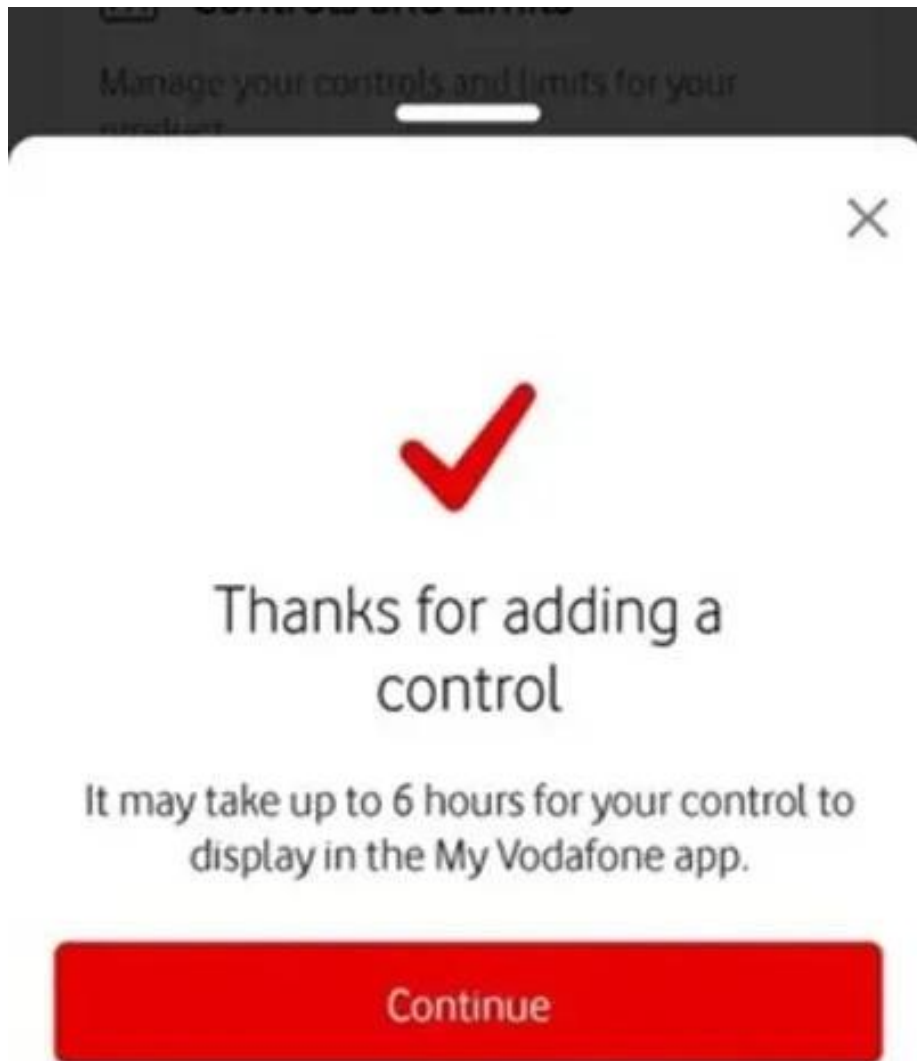

**Step 3** – On the pop-up, click **Turn on** to block access to 18+ rated content.

**Step 4** – Click **Continue** to finish setting the control. It might take up to 6 hours for the control update to show in the app.

<?xml encoding="UTF-8">

<?xml encoding="UTF-8">

Your child will now be unable to access any content that is rated 18+.

## How to set up Secure Net parental controls

Secure Net is available to any Vodafone customer. You can add it to your plan and then login using your regular Vodafone account login details. With Secure Net, you can set up additional parental controls to keep your family safer while they browse.

## To set up parental controls:

**Step 1** – Login to your Secure Net app. For your first time logging in, read through and follow the prompts. Then select '**Children**' from the bottom menu.

**Step 2** – Read through the features and then select '**Set up child profile**'. Follow the prompts to add their name and an avatar.

## Create a child profile

Help manage what your children see and do online - with up to 6 child profiles.

To get started, create a child profile and set age-appropriate content controls.

If you have Secure Net Home, you can then add all of the WiFi connected devices your child uses in the home. And if your child has Secure Net Mobile, you can assign their mobile number for protection whilst connected to our mobile network.

With both Secure Net Mobile and Secure Net Home, you can enjoy a single set of parental controls that work seamlessly across mobile and broadband.

**Step 3** – Select a content filter for your child's profile:

**Ultra Safe:** Your child cannot access content which is for adults or is a security risk. They also cannot access sex education content, social media or chat.

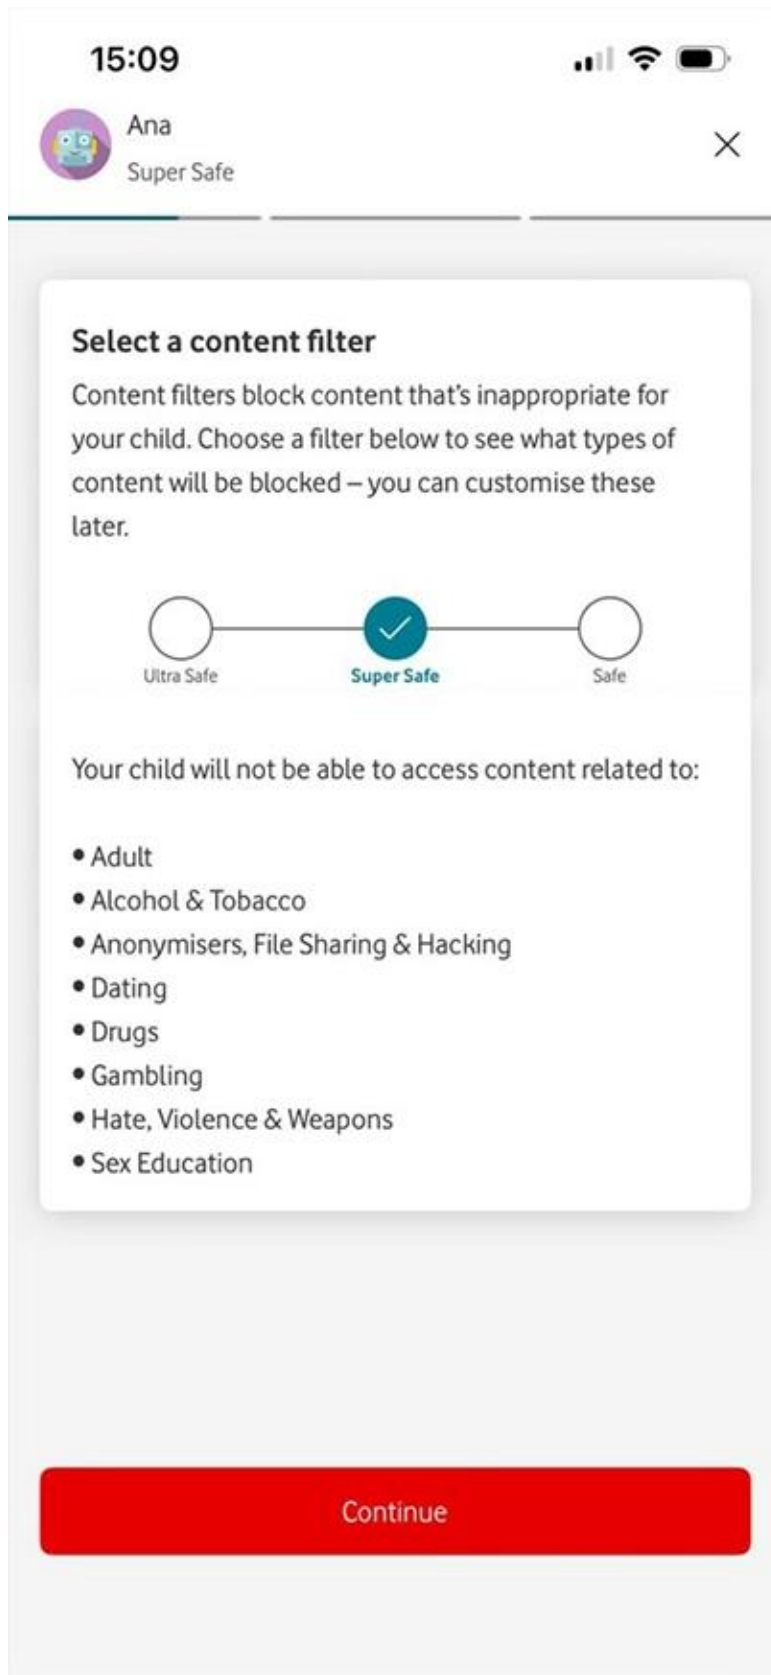

**Super Safe:** Your child cannot access adult content, content which is a security risk or sex education content.

**Safe:** Your child cannot access adult content or content that is a security risk.

### Select a content filter

Content filters block content that's inappropriate for your child. Choose a filter below to see what types of content will be blocked – you can customise these later.

Your child will not be able to access content related to:

- Adult
- Alcohol & Tobacco
- Anonymisers, File Sharing & Hacking
- Dating
- Drugs
- Gambling
- Hate, Violence & Weapons

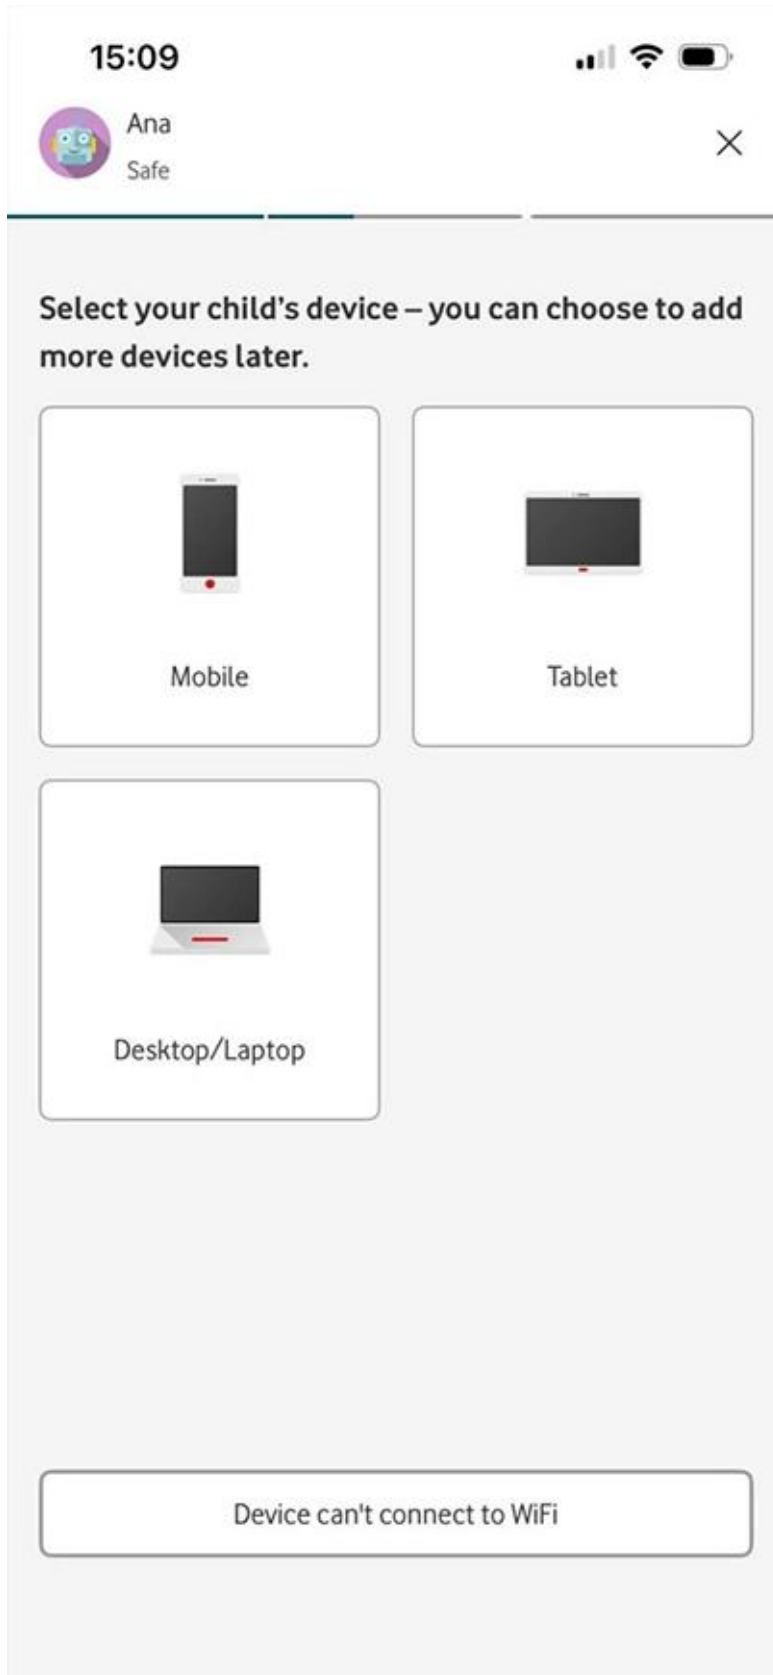

Continue

**Step 4** – Add your child's device(s) that you want protected under Secure Net. Continue to follow the on-screen prompts to complete setup or come back to them later.

**Step 5** – Choose whether you want to set up a bedtime for your child. This will turn off the internet on your child's device when it's bedtime.

**Step 6** – Select the dates and times that your child's bedtime will be set and click **Confirm**.

### Would you like to set up your child's bedtime?

This means that internet will be turned off on their connected devices when it's bedtime.

You can add multiple bedtime schedules, for example, one for school days and another for weekends.

## Manage your child's device use with Secure Net

Once you have set up your child's Secure Net profile, you can manage how your child uses their device from the Secure Net app.

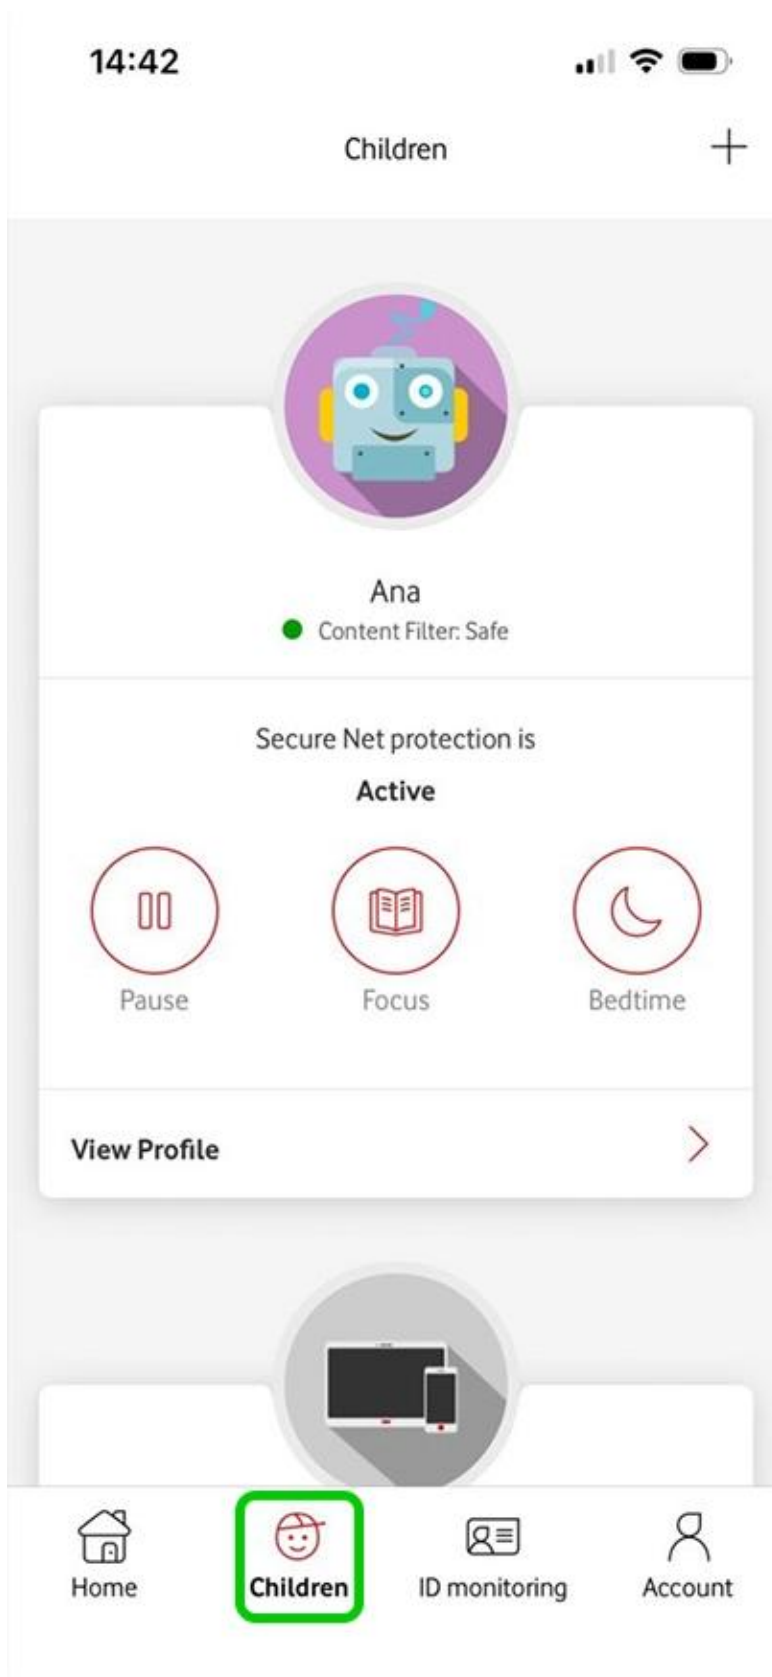

### To use Secure Net to manage your child's device:

**Step 1** – Login to your Secure Net app and select **Children** from the bottom menu to be taken to your child's profile.

<?xml encoding="UTF-8">

<?xml encoding="UTF-8">

**Step 2** – From your child's profile, you can use the buttons to manage your child's experience. These buttons are:

**Pause:** Pauses your child's internet access for a selected duration, or until you turn pause off.

**Focus:** Blocks access to entertainment apps, such as social media, to prevent distractions during studying times.

**Bedtime:** Turns off internet on your child's device until the selected time.

Children

The screenshot displays the 'Children' app interface. At the top, the time is 14:42 and the status bar shows signal, Wi-Fi, and battery icons. The main header is 'Children' with a plus sign. Below this is a profile card for 'Ana', featuring a blue robot icon in a red circle. A green dot indicates 'Content Filter: Safe'. The card shows 'Internet is paused for 59:49'. Three control buttons are visible: 'Pause' (a red circle with a white pause symbol, highlighted with a green border), 'Focus' (a red circle with a book icon), and 'Bedtime' (a red circle with a crescent moon icon). Below the buttons is a 'View Profile' link with a right-pointing arrow. At the bottom of the card is a large grey circle containing an icon of a tablet and a smartphone. The bottom navigation bar has four icons: 'Home' (house), 'Children' (robot), 'ID monitoring' (ID card), and 'Account' (person).
