

Xbox 360 Parental Controls Controls & settings guide

The Xbox 360 Parental Controls can restrict access to features like Xbox Live and specifically which games can be played, which films and TV shows can be watched and how long each family member can use the console on a daily or weekly basis.

1 Activating parental controls

To begin setting controls on an Xbox 360, you must first turn the parental controls on, activating a preset of controls, and then you can begin editing each control individually.

To activate parental controls:

Step 1 – From the Xbox home screen, navigate to Settings.

Step 2 – On the Settings screen, select Family.

Step 3 – Inside Family Settings, click Content Controls.

Step 4 – Click the **On** to activate the preset content controls on the Xbox 360.

Step 5 – When you're finished select '**Save and Exit**', which will prompt you to create a passcode if you haven't already done so.

Step 6 – Create your pass code, which will be required whenever you want to change the parental controls in future.

Now the controls are on, you are able to select different options and customise your parental settings.

Now that parental controls have been switched on, you can begin editing your child's specific privacy settings.

To edit privacy settings:

internet matters.org

Step 1 – From the Family settings, select the **profile** that you want to set controls on.

Step 2 – In your child's profile settings, go to Privacy & Online Settings

Step 3 – Select Change Settings at the bottom of the screen.

Step 4 – In the Privacy & Online Settings, click **Customize** to begin editing the settings.
