Os X Yosemite

Controls & settings guide

Once you've set up a 'Child Account' on Apple Family Sharing you can manage your child's activity on the device and online. You get automated reports and weekly email breakdowns of their activity to adjust settings if needed.

How to set parental controls OS X Yosemite

Microsoft Family lets you set spending restrictions across consoles and devices.

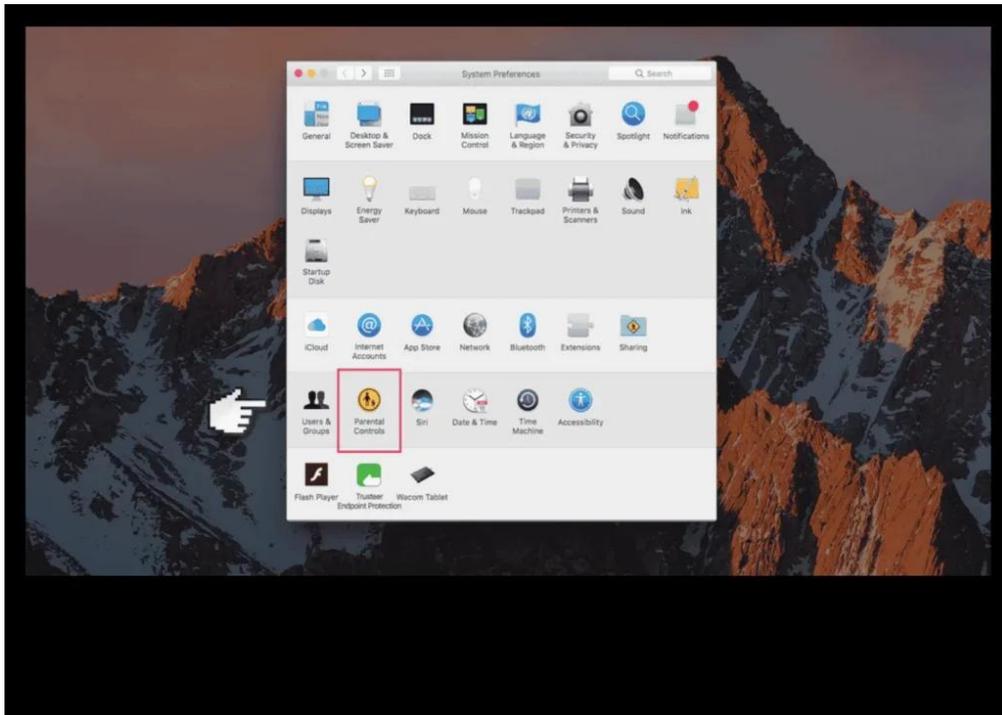

To help limit accidental spending, you can use Xbox Series parental controls settings.

To set spending limits with Microsoft Family:

Step 1 – On your mac desktop, choose **Apple menu** in top corner and system preferences.

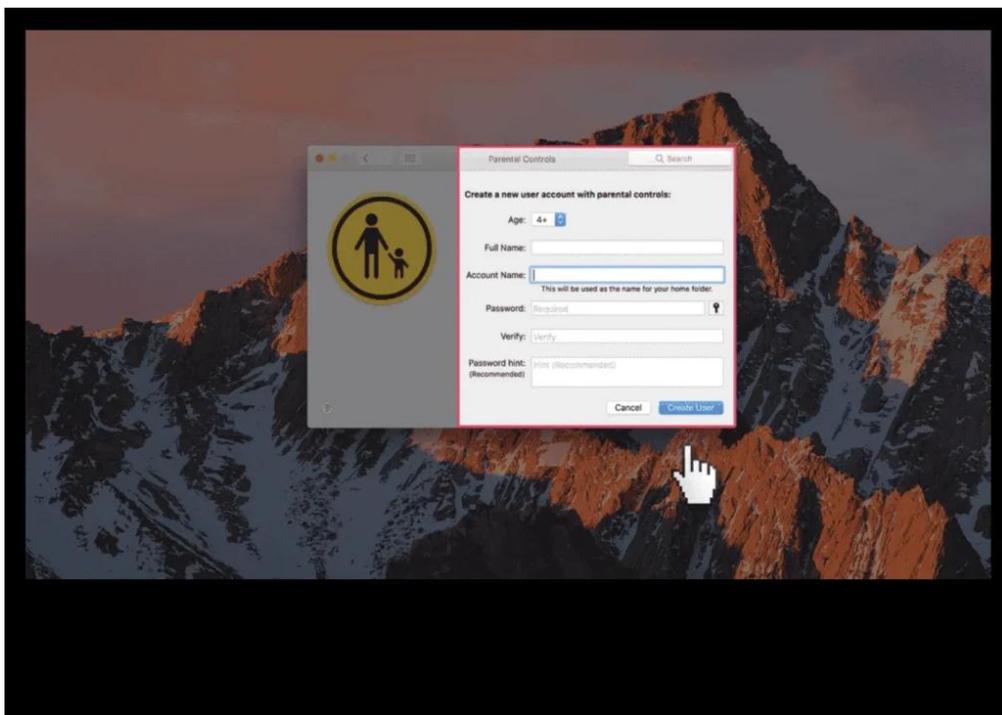

Step 2 – Then click **Parental Controls**.

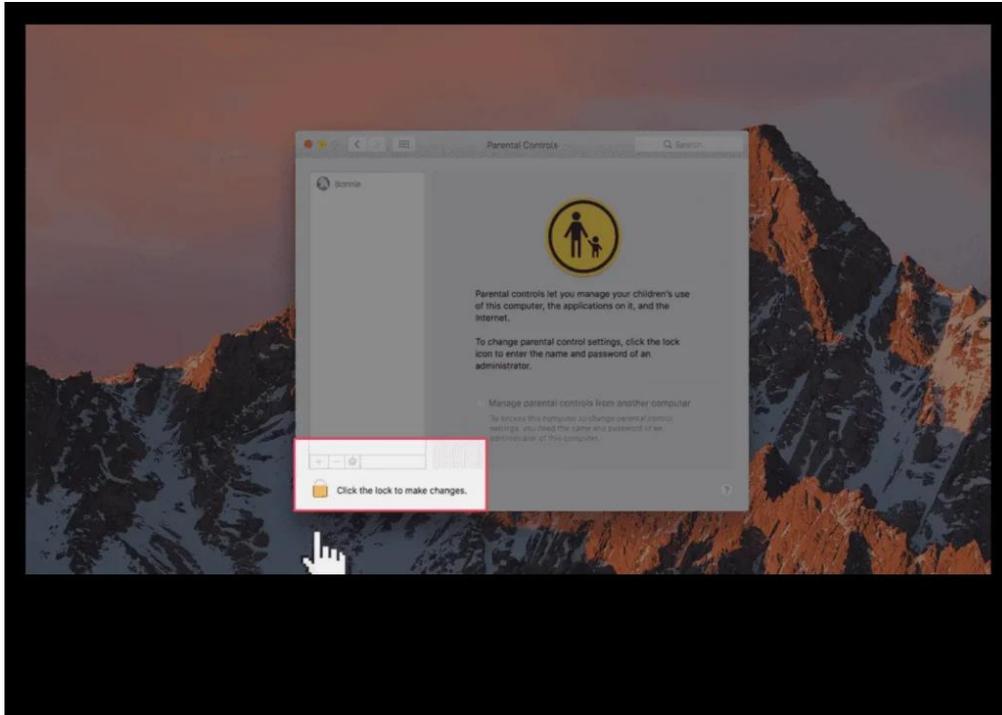

Step 3 – When you open **Parental Controls** preferences.

If you see the message “There are no user accounts to manage,” you’ll need to create another profile which you can manage.

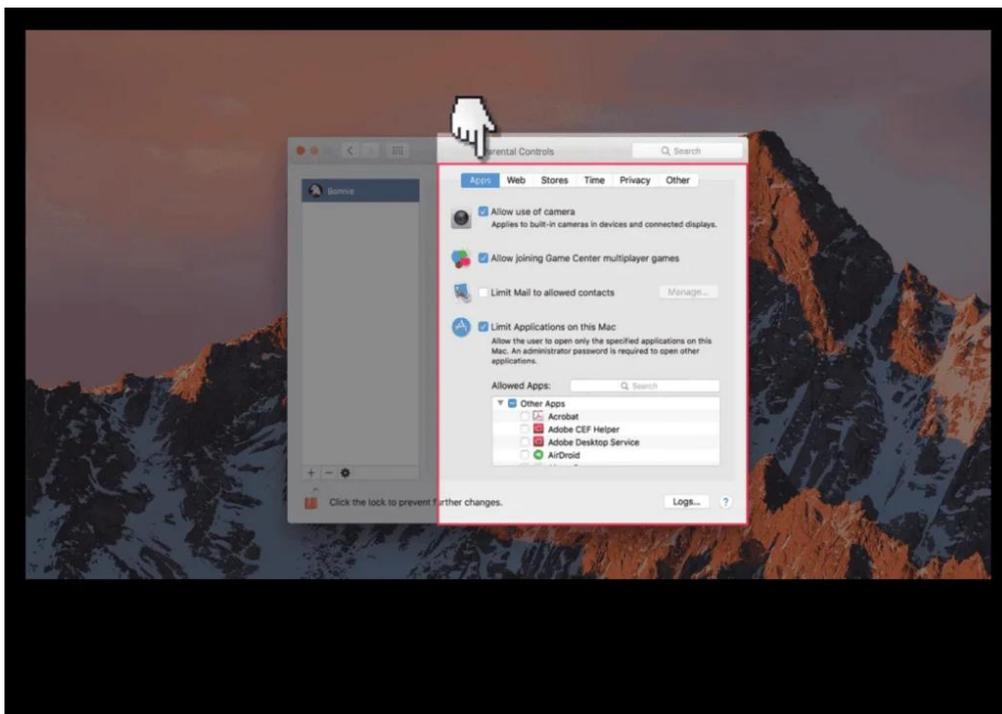

Step 4 – Select the **user**, then click **Enable Parental Controls**.

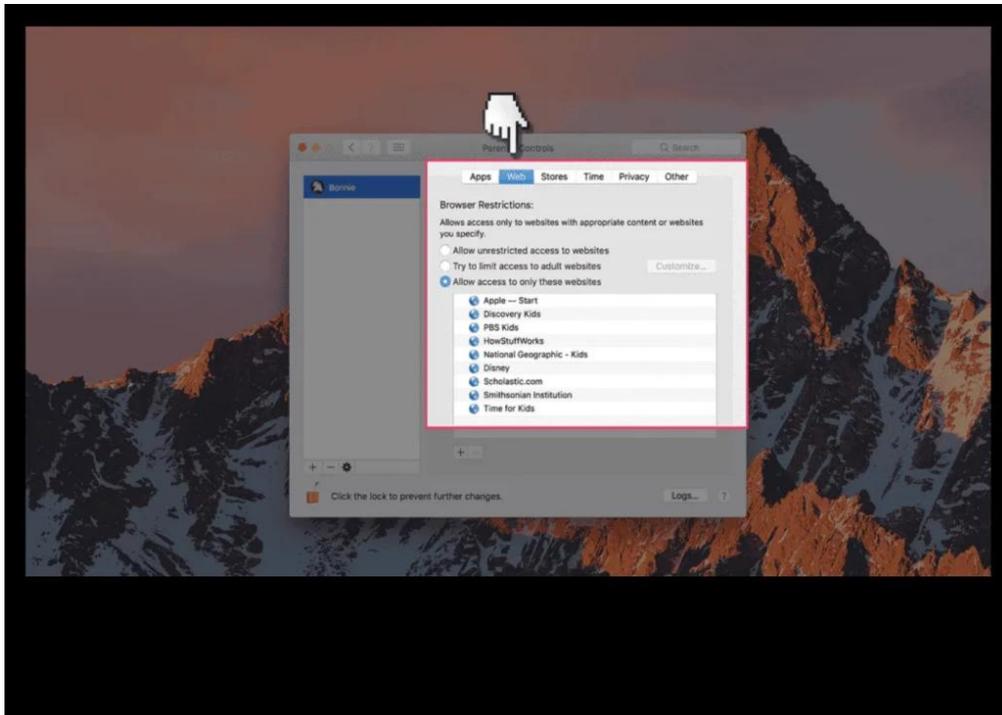

Step 5 – Click one of the tabs along the top to start restricting things.

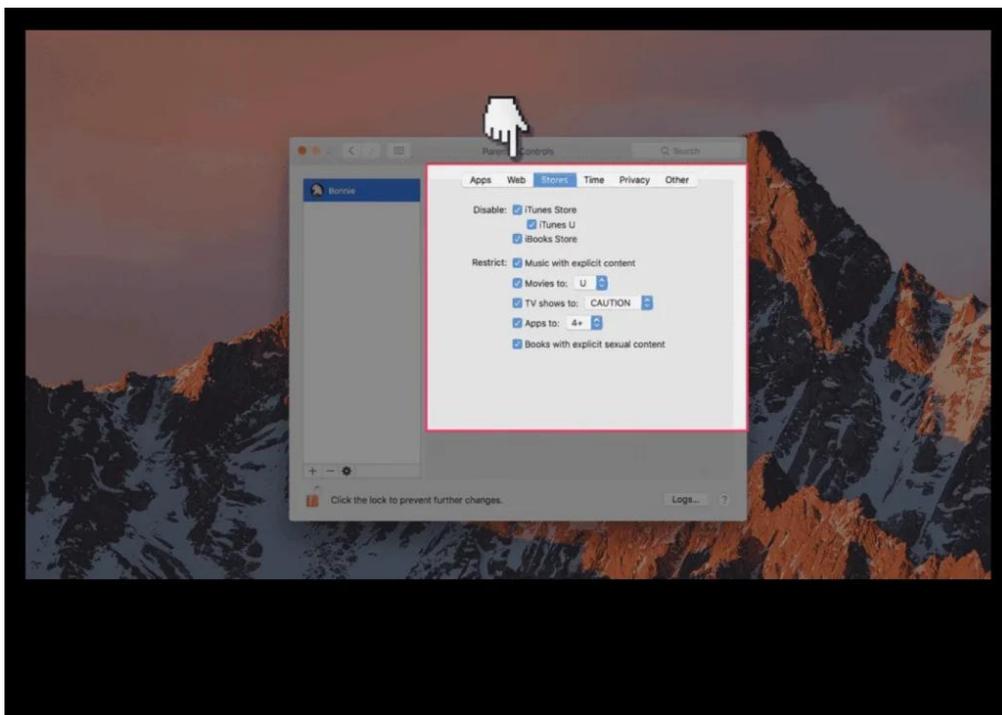

First on the list is **Apps**. Specify which apps the child can access.

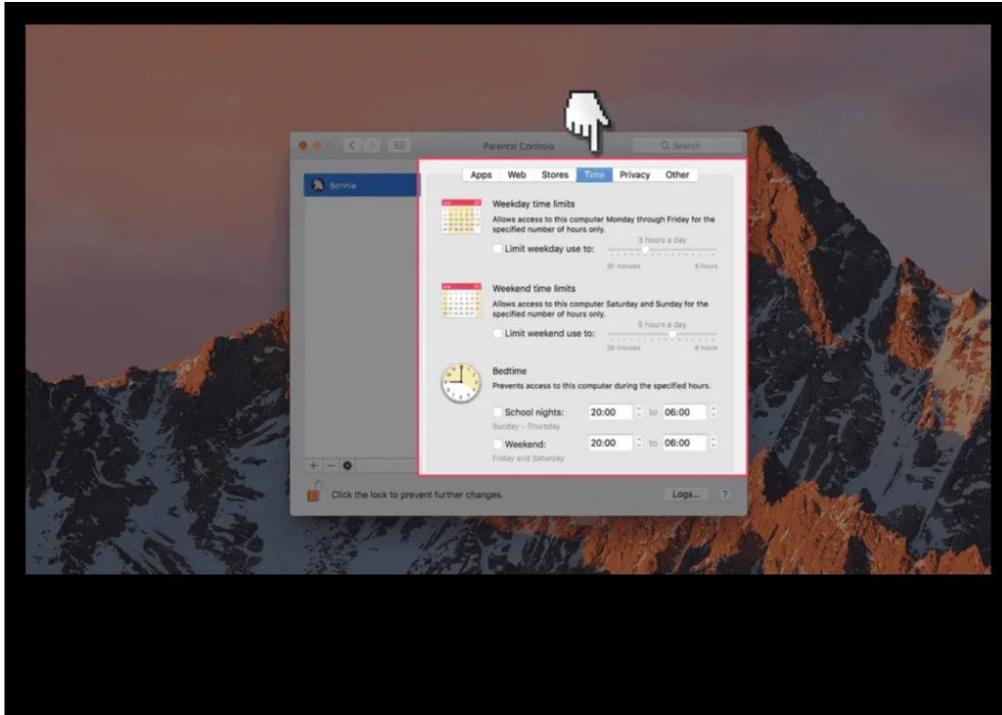

Step 6 - Select web to specify which websites the child can access.

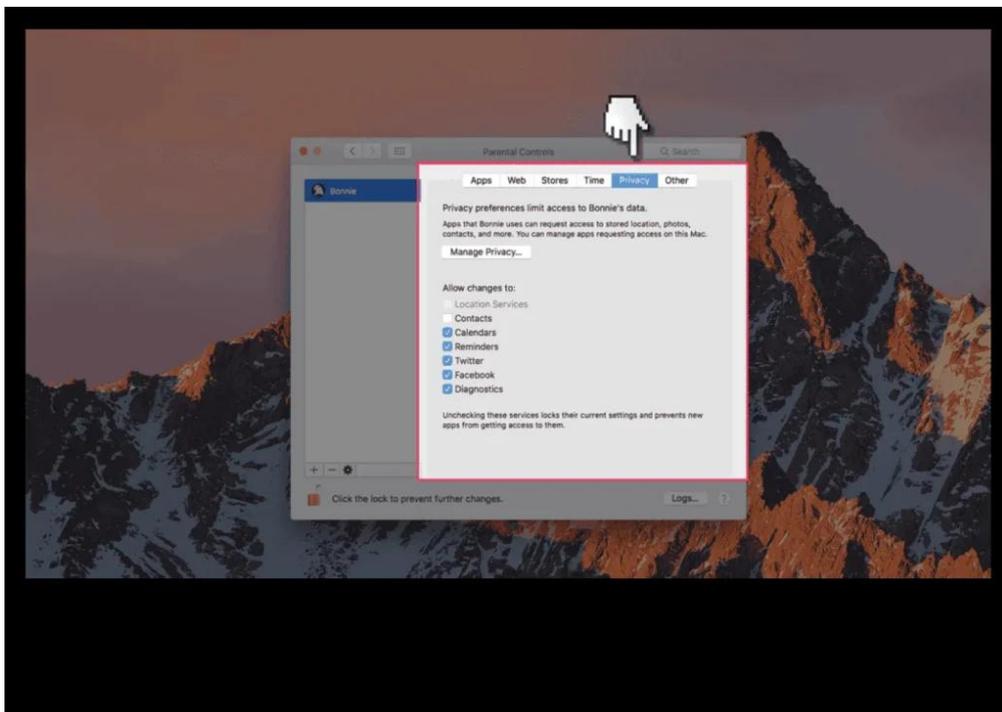

Step 7 - Select **stores** to specify which online entertainment sites the child can access.

Step 8 - Select **time** to specify what time periods the child can access the Mac.

Step 9 - Select **privacy** to specify which apps can access the child's data.

Step 10 - Select **other**.

This allows you to specify the last remaining software you may want the child to have restricted access too.
